At JaySee computers we design and build each computer system individually to suit your requirements and budget. You can buy just the box to use as an upgrade with your existing monitor keyboard & mouse, or the complete system. We can supply Pentium, AMD & Celeron based computers with everything supplied as part of the motherboard or with additional expansion cards where more performance is needed. Whether you want to merely send a few e-mails and browse the web or watch TV, edit you home movies and play the latest games we can build you a computer that will fulfil all your needs and won't cost you the earth. Let us know what you want your computer to do and we will custom build one for you

Here are some examples of standard systems, each one is still built to suit our customers needs and budget. We can also transfer existing documents from your old PC at no extra charge.

A Small business without the high price tag will still give you all the storage you need and allow for remote access.

The Micro computer when upright is almost half the width of a standard computer for when space is at a premium.

The Shuttle cube computer is for where looks count. There is a range of stylish cube cases available in many different colours, they can be personalised to suit all specifications.

The prices shown are based on the date built and do not necessarily reflect the current price for these models

Media Centres are a computer, TV, Radio and games console all in one. Link them to a wide-screen monitor and watch your favourite DVD's while recording the TV to watch later.

Call us today for a quote and see just how much money we can save you. All our systems come with a one year warranty and we'll even come and set them up in your home if you require.
